

SOLAR DC CONNECTOR - MC4

A solar array is all about DC-connectors. After all, DC-connectors link solar panels to each other, and DC-connectors couple solar arrays to inverters in order to successfully produce a flow of electricity. Hence, DC-connectors are crucial components for the reliable and safe operation of PV-systems.

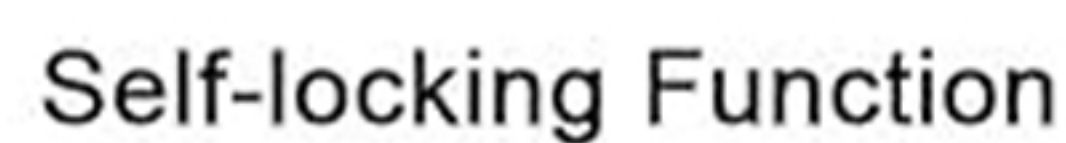

- Application for 1000V DC (IEC), AND 1000V DC (UL).
- Professional technology on Quality and Durability.
- On site or Pre-installed ways are allowed, standard crimping tools can be applied into use.

TECHNICAL DATA

MODEL	MC4
IP LEVEL	IP-67
Rated Voltage	1000V DC
Rated Current	32 A
Rated connecting capacity	4.0 - 6.0 mm
Certificates	CE, ROHS
Product Size	99.8x18.55 mm

IP67 Waterproof Ring

Prevening Electric Dhock
